Natalia Witek

Senior QA Automation Engineer (SDET)

nataliaa.witekk@gmail.com · linkedin.com/in/witeknatalia · github.com/witeknatalia · witeknatalia.github.io

I design and build robust test automation frameworks that catch bugs before they reach production. Passionate about quality engineering, shift-left testing, and making CI/CD pipelines smarter.

5+
Years Experience

>95%
Bug-resolution rate maintained

500+
User stories tested in 6 months

SKILLS & TOOLS

[Test Automation]
WebdriverIO · Playwright · Cypress · Appium

[Languages]
TypeScript · JavaScript · SQL · Java (basics) · Python (basics)

[CI/CD & DevOps]
Jenkins · GitHub Actions · GitLab CI · Docker · Kubernetes (testing in K8s environments)

[API & Performance]
Postman · Swagger / OpenAPI · k6

[Tools & Tracking]
JIRA · Confluence · TestRail · Allure Report · Git

[Methodologies]
Agile / Scrum · Shift-Left Testing · Risk-Based Testing

EXPERIENCE

Senior QA Automation Engineer (SDET)

07.2023 — Present

FRU.PL S.A.

- Led end-to-end test automation for three international travel booking platforms (PL, RO, EU), architecting a WebdriverIO + TypeScript framework covering critical flows: subscriptions, bookings, and payments across responsive web and native mobile apps.
- Achieved zero critical bugs in production for the flagship web platform by owning the full manual + automated QA cycle.
- Tested 500+ user stories in 6 months, maintaining a >95% bug-resolution rate and cutting regression cycle time by 30% through automated suites.
- Integrated TestRail and Jira to provide end-to-end traceability, giving the whole product team real-time QA visibility.
- Upgraded WebdriverIO to the latest major version, eliminating legacy compatibility issues across test environments.
- Ran automated suites in Docker containers and tested against Kubernetes-based environments, integrated with Jenkins and GitLab CI pipelines.
- Used AI assistants (GitHub Copilot, Claude) to speed up test generation and to analyze flaky test failures, shortening triage time.

WebdriverIO · TypeScript · GitHub Actions · Jenkins · GitLab CI · Docker · Kubernetes

QA Automation Engineer

02.2021 — 06.2023

Selleo Sp. z o.o.

- Built an automated Cypress testing pipeline from scratch for Defined Learning (EdTech SaaS, US client), running in Docker and integrating Percy.io for visual regression to guarantee UI consistency across releases.
- Led full-cycle manual and cross-platform compatibility testing for Humly (mobile-first job marketplace, Swedish client) — covering web, Android (Android Studio), and iOS (Xcode).
- Researched and implemented new automation tooling that reduced manual testing effort by 60%, freeing engineers for exploratory and edge-case work.

Cypress JavaScript Percy.io Docker

EDUCATION & CERTIFICATIONS

ISTQB Certified Tester
GASQ

Master's in Game Programming
Jagiellonian University
2020 — 2022

Bachelor's in Games and Mobile Applications Programming
University of Economics in Katowice
2017 — 2020
